FOREWORD

Typographical errors and printer's errors are something to be watched for by anyone who produces printed material. Even though various spellcheckers can be used today it is still possible for errors to arise.

I read through my catalogues carefully, spell-check them and ask someone else to read them but nevertheless errors do sometimes occur. They seem to stand out when I pick up and first read the printed copy.

There have been famous errors in the history of printing, particularly with Bibles. King Charles I and the Archbishop of Canterbury were outraged by an edition of the Bible published in 1631 by Robert Barker and Martin Lucas, the royal printers in London, meant to be a reprint of the King James Bible. Generally called the **Wicked Bible**, this name comes from a mistake made by the compositors: in the Ten Commandments (Exodus 20:14), the word "not" in the sentence "Thou shalt not commit adultery" was omitted, thus changing the sentence into "Thou shalt commit adultery". They were fined 300 pounds, a large sum in those days, and their license to print books revoked.

Other Bible errors include the so-called "Murderer's Bible," which refers to three different Bibles, including a King James version from 1795 that contains a typo in Mark 7:27 that says: "Let the children be killed," instead of "filled."

The opening of "The Vocabulary of East Anglia.." 1830, by Rev. Robert Forby has the bold heading "PEEFACE".

Errata slips listing errors found after printing are still to be found in some books.

I do hope you enjoy reading the catalogue and find no errors!

Peter
